

## AMENDMENTS TO THE CLAIMS

1-9. (Canceled)

10. (Currently Amended) A kit ~~for treating symptoms associated with multiple sclerosis~~ comprising:

human growth hormone;

thyroid hormone; ~~and~~

at least one of the supplemental hormones selected from the group consisting of sex hormone, melatonin hormone, adrenal hormone, and thymus hormone,

wherein the human growth hormone and the at least one of the supplemental hormones are present in an effective amount and in a separately administerable form for establishing a regimen for a human subject afflicted with multiple sclerosis for administration of the human growth hormone and the at least one supplemental hormone;

a regimen for administration of the human growth hormone, the thyroid hormone, and the at least one supplemental hormone for reducing symptoms commonly associated with multiple sclerosis.

11. (Previously Presented) The kit of claim 10, wherein the amount of human growth hormone is provided in intravenous unit form in doses of up to 0.5 mg per day.

12. (Original) The kit of claim 11, wherein the amount of human growth hormone is administered twice daily.

13. (Original) The kit of claim 10, wherein the sex hormone comprises at least one of testosterone, progesterone, and estrogen.

14. (Currently Amended) A kit ~~for treating symptoms associated with multiple sclerosis~~ comprising:

human growth hormone;

thyroid hormone; ~~and~~

at least one supplemental hormone selected from the group consisting of sex hormone, melatonin hormone, adrenal hormone, and thymus hormone;

a regimen for administration of the human growth hormone, the thyroid hormone, and the at least one supplemental hormone for reducing symptoms commonly associated with multiple sclerosis,

wherein the human growth hormone and the at least one of the supplemental hormones are present in an effective amount and in a separately administerable form for establishing a regimen for human subject afflicted with multiple sclerosis for replenishment of the human growth hormone and the at least one supplemental hormone within a body to levels associated with the second or third decades of an average human subject.

15. (Previously Presented) The kit of claim 14, wherein the amount of human growth hormone is provided in intravenous unit form in doses of up to 0.5 mg per day.

16. (Previously Presented) The kit of claim 15, wherein the amount of human growth hormone is administered twice daily.

17. (Previously Presented) The kit of claim 14, wherein the sex hormone comprises at least one of testosterone, progesterone, and estrogen.

18. (Currently Amended) A kit ~~for treating symptoms associated with multiple sclerosis~~ comprising:

human growth hormone;

thyroid hormone; and

pregnenolone in doses between approximately 100 and 200 mg per day,;

wherein the human growth hormone and the pregnenolone are present in an effective amount and in an administerable form for establishing a regimen for replenishment of the human growth hormone and the pregnenolone within a body diagnosed with multiple sclerosis.

19. (Previously Presented) The kit of claim 10 comprising at least two supplemental hormones.

20. (Previously Presented) The kit of claim 14 comprising at least two supplemental hormones.
